

MASTER 4.0 3. NEWSLETTER

Third transnational online partner meeting

The third transnational project meeting was supposed to take place in Zagreb, Republic of Croatia, but due to the still existing circumstances of the coronavirus pandemic, it took place online on **28 and 29.6.2021**. The partners presented their work on the development of exam questions and programs, and an online platform was presented in the final stage. On the second day, a planned education was held for the use of an online platform for experts from partner countries

Online education held for the use of online platform for the implementation of master craftsman exams

As part of the third transnational project meeting of partners, an online education was held for the use of an online platform for the implementation of master craftsman exams. Online education took place on June 29, 2021, and was intended for experts from partner countries to get acquainted with the work on the platform and the implementation of master craftsman exams through the platform.

The preparation of programs and questions for master craftsman exams in partner countries

Based on the drafted methodological framework, partners from Croatia, Slovenia, North Macedonia, and Montenegro produced new exam questions for master craftsman exams. In all partner countries, exam questions for general parts of the exam are improved on which partners cooperate and exchange experiences. The partners are also nearing completion of the preparation of questions for the professional-theoretical parts of the master craftsman exam. The Craft Chamber of Slovenia improves the professional-theoretical parts of the master's exam for the professions of carpenter, *bricklayer*, and *electrician*, while partners from North Macedonia - The Artisan Chamber of Skopje and the Association Happy Life produce questions for the professional-theoretical part of the exam for the profession of *beautician* and exam programs for the professions of *auto mechanic* and *baker*. The Craft-Entrepreneurial Chamber of Montenegro produces exam questions for the professional-theoretical part of the exam for the title of *tailor of high fashion* and the program of master craftsman exam and exam questions for the title of *photographer*. The Croatian Chamber of Trades and Crafts produces questions for the professional theoretical part of the exam for the occupations *hairstylist*, *auto mechanic* and *electrician*. Once completed, the questions will be piloted through an online platform at master craftsman examinations in each partner country at the end of the year.

Design of the online platform for preparing and taking the master craftsman exam

In order to further improve the taking of the master craftsman exam in partner countries, the project creates an online platform consisting of an open part and parts for the preparation and taking of the master craftsman exam. The part of the online platform that will be open to the public will allow everyone interested to see the conduct of the master craftsman exam and thus promote the master's title. The platform is made by Algebra. During the online meeting of partners in June 2021, Algebra presented all the functionalities of the platform and education was held for the use of the platform for professionals in partner countries.
